

Directive #2 Q& A's from MOH

Dear Manager,

As a follow-up to the email sent to the membership last Thursday regarding the revision of [Directive #2](#) for Health Care Providers stating that all non-urgent/non-emergent procedures should be ceased.

The MOH has since developed this [Q & A document](#) to answer questions about these recent directive changes.

Registrants are reminded that the College's guidance about practising in the Context of COVID-19 and its guidance regarding the use of PPE, for example, are still to be followed. You can find the College's guidance regarding [COVID-19 here](#) and [COVID-19 FAQs for Practitioners](#).

Sincerely,
The College of Chiropractors of Ontario
