

Updated MOH COVID Guidance: Primary Care Providers in a Community Setting

On July 28, 2021, the Ministry of Health released an updated version of the COVID Guidance for Primary Care Providers in a Community Setting.

We recommend Chiropractors and Podiatrists who work in private practice to review this guidance.

Some key highlights from the document are listed below. Please pay close attention to these sections as the changes may impact your practice.

- Cleaning of clinical areas
- Screening Requirements
- Guidelines for vaccinated and unvaccinated staff
- The use of Personal Protective Equipment (PPE)

Review the [COVID Guidance: Primary Care Providers in a Community Setting](#) document and PIDAC's Best Practices for Environmental Cleaning for Prevention and Control in All Health Care Settings for full details.

Updated COVID-19 Self-Assessment

On July 28, 2021 the government also released an updated [COVID-19 self assessment](#). Individuals should take the self-assessment if they believe they have been exposed to COVID-19 or have symptoms to determine next steps.
